

SnapNDrag Pro is an incredibly simple screen capture. . It's fast, easy to use, and takes screenshots exactly where you need them. You can start capturing your screen in one click as soon as you turn on the app. SnapNDrag also supports full screen capture and has various storage options. SnapNDrag gives you complete freedom and convenience in how you want to save or share your screen recording. I have two Android apps that I use: SnapChat and SnapNDrag. SnapChat helps me record chat conversations. And SnapNDrag allows me to record and save a screen recording.
