Limitations: ? No language selection CursorChoice Description: CursorChoice is a tool that allows users to provide images of their own design, which you can then download and use as your own private cursor, without any copyright issues. It is based on the idea that every single image contains a certain amount of information, that can be used in a calculation that will create a cursor based on the combination of the both images. As long as you know the information and its position in the two images, it is possible to create a new unique cursor. Limitations: ?
