After doing this, open the AUTOCAD program, select "Options" (from the Edit menu), and on the Options dialog box, click the "Tools" tab. The icon you see in the figure is called "DISPLAY" and is used to specify what information appears in the "Display Options" dialog box. By default, it is set to None. To see what it looks like, open the "Displays" dialog box (on the Edit menu), and click the "Display Settings" tab. To do this, click the "Display" tab, click the "Display Settings" button, and make your selections from the list of files that appears. Next, you will need to set the Import Options for the FEZORD command. In the Tool Options dialog box, click the "FEZORD" tab, and then click the "Tool Options" button. In the "Tool Options" dialog box, you can see that there are default settings already set for the FEZORD command. The settings in the dialog box are the default settings for the command.
