Click to see the key features of this apk. We don't host or upload anything on our server. This website dedicated for create article on different media like News, Technology, Health, Sports, Politics etc for give complete information about current affair all over the world. The Family Heart Plan The heart is so important that most people don't realize it's made of muscle! The heart and the cardiovascular system are integral components of the brain, governing how we think, act, and feel. So when something goes wrong with either organ, we get problems. By taking control of your heart, you can avoid heart disease, stroke, and even death. This book is all about prevention. It's about living a long, healthy life. Why does the family need the heart plan? Ask a hundred family doctors the following question, and you are likely to get a hundred different answers: What is the most serious life-threatening problem that one parent or both parents can die from in the first year of the child's life? These problems are silent killers: No one talks about them, because they usually don't need a doctor. The most common ones are type 1 diabetes, high blood pressure, and rheumatic fever. The Family Heart Plan is the most comprehensive attempt ever to provide family doctors and other health professionals with a practical, down-to-earth approach to prevent these illnesses in the family. It's really all about lifestyle. The plan features the most current, accurate information about these problems, based on the best studies available. The Family Heart Plan answers the question directly, and without ambiguity. The answers are inspiring, practical, and scientific. Some are funny, too. How does the plan work? The book gives you a five-step plan to take control of your heart, and use that control to avoid illness in your family. It gives you a road map to the knowledge you need to live a healthy
